## **PC Power and Cooling's Turbo-Cool 1KW-SR Selected by AMD to Power AMD Quad FX Platforms**

Carlsbad, California, USA, December 1st, 2006

PC Power and Cooling, Inc. today announced that AMD has selected its Turbo-Cool 1KW-SR to power the AMD Quad FX Platform. AMD's (NYSE:AMD) introduction of the AMD Quad FX Platform with Dual Socket Direct Connect (DSDC) Architecture has given PC enthusiasts and performance power users unprecedented megatasking capability. Designed to take advantage of Microsoft Windows Vista™ Ultimate, the AMD Quad FX platform consists of two AMD Athlon™ 64 FX-70 series dual-core processors and supports four (4) PCI-E graphics cards, twelve (12) SATA ports, and can power eight (8) monitors using two identical NVIDIA 680a chipsets supporting dual- or quad- SLI™. With this remarkable new level in computing performance, a reliable, ultra high-performance power supply becomes an essential system component.

PC Power and Cooling, Inc. provides the power supply now used by AMD for AMD Quad FX platforms. The power supply, the Turbo-Cool® 1KW-SR, is built with a single 12 volt rail so that all the power is available to the system, avoiding distribution losses (up to 30% of the wattage rating) and over-current shutdowns inherent in multi-rail 12 volt designs.

The Turbo-Cool 1KW-SR is based on the proven, upscale technology of the renowned Turbo-Cool 1KW, the industry's first One Kilowatt PC enthusiast power supply, introduced in September 2005. Rated for 1000 watts of continuous power at 50°C (1100W peak), the Turbo-Cool 1KW-SR is an efficient EPS12V power supply with clean, stable output in a form factor that fits most ATX cases. Its complete array of output connectors includes quad PCI-E connectors.

The Turbo-Cool 1KW-SR power supply is approved by major safety agencies, carries a 5-year warranty, and retails for \$529. It is currently shipping world-wide, and is available direct from PC Power and Cooling as well as through e-tailers such as NewEgg.com and specialty retailers such as Fry's Electronics and Micro Center.
